

Capabilities Statement

Ark provides end-to-end application development, consulting, and re-engineering solutions across all major technologies. Our solutions and services help build enduring relationships with our clients. Our team has over 15 years of IT experience designing and developing IT solutions and implementing custom software for corporations and government agencies.

Ark recently acquired [Slauth.io](#), an open-source cybersecurity firm specializing in AI-based IAM policy for cloud infrastructure using a shift-left strategy. This acquisition enhances Ark's IT solutions for federal and state agencies by identifying and remediating security risks in code repositories and AWS environments, reducing vulnerabilities, technical debt, and workload for security teams.

Past Performances

Project & Program Management:

Provided PPM support to the Department of Health and Human Services and the National Disaster Medical System (NDMS) to create a nationwide IT application and infrastructure deployment.

Cloud Migration & Architecture:

Designed, built, and supported extensive, secure AWS Cloud Infrastructure. Supported mission-critical applications supporting emergency responders for the Assistant Secretary for Preparedness and Response (DHHS/ASPR).

Electronic Records Management:

Implemented solutions to comply with NARA Records Management requirements for multiple agencies. Extensive experience implementing records management, disposition schedules, and record retention methodologies for agencies' electronic records.

Data Analytics / Power BI:

Performed critical Data Analytics and Data Engineering work as part of The Data Initiative Team at HHS/OCIO. Technology tools used: Power BI, Python with Jupyter Notebooks, Pandas, Geo Pandas, PowerShell Scripts, and MySQL

Office365 / SharePoint / Power Apps:

Ark has over 12 years of experience delivering Microsoft SharePoint-based application development support to various agencies including HHS, NIDCR, NHLBI, ASPR, NIH/CIT, and others. Helped DHS/ASPR to migrate to the Office365 cloud and build PowerBI-based business intelligence tools. We implemented a Qlik-based BI dashboard for the State of Maryland – MDTHINK project.

IT Consulting and Staffing Services:

For over 14 years, Ark has provided IT staffing and consulting services to a range of federal and state agencies, including the FAA, NIH, Maryland DHS, HHS/ASPR, GSA, MDH, Maryland Judiciary, and the States of Kentucky, Ohio, and Florida, with a team of over 70 skilled professionals.
